

First Look

6170H

Wall Mount Pro Series

Genie's Model 6170H features our wall mount design plus the integrated Aladdin Connect. This garage door opener eliminates the traditional rail & powerhead design by attaching directly to the garage door's spring tube. Eliminating the rail & opener from the ceiling brings a clean and open look to your garage. Enjoy the view or use the freed-up space for storage or other purposes. This is ideal for garages with beam obstructions that prevent the installation of a traditional opener. The compact design fits into tight side room spaces.

Motor: 24 Volt, Lifts Up to 850lbs

Aladdin Connect: Built in, works with Alexa

Included: Wireless Wall Console, Door Lock, Flexible Placement LED Light Fixture

Warranty: Limited Lifetime*

Supports: 64 Remotes, HomeLink®, Car2U® (No bridge required)

Wall mount style

Clears ceiling space by eliminating rail and powerhead from the ceiling. You can use the freed-up space for extra storage or just enjoy the clean, uncluttered look.

Standard Features

- **Patented Dual Frequency Technology**
 - Automatically finds the best line of communication between Genie® products. This maximizes the range of radio frequency devices and improves the overall performance of products.
- **Intellicode Security Technology**
 - Keeps your home and Family safe by Changing the access code From billions of combinations At each door activation To help prevent unauthorized access
- **GenieSense™ Monitoring and Diagnostic Technology**
 - Provides safety by continuously monitoring the operation of the garage door opener, stopping the operation to alert you when significant changes occur.
